

# THE MISSING BARBEGAZI

## A BARBEGAZI PERSPECTIVE

The barbagazi are scared of humans and have lived in total isolation for more than 150 years. Their vocabulary is therefore old-fashioned, and they have no words for recent inventions. Here are two examples of how they describe things:

Helicopter: a flying vehicle with rotating metal blades

Snow groomer: a metal monster that growls like a thousand dogs

Think of some modern inventions and write down how a barbagazi would describe them. Perhaps you can make a drawing too!
